Tracing test cases

ll = LinkedList() 7 → None
ll.insertHead(7)
ll.Print_LL()

---

5 → 6 → 7 → SuperMan → None
ll.insertHead(6)
ll.insertHead(5)
ll.Print_LL()
ll.insertTail("superman")

---

ll.get(3) superman
ll.get(2) 7

---

ll.getValues() [5, 6, 7, "SuperMan"]
ll.remove(0) True
ll.getValues() [6, 7, "SuperMan"]
ll.Print_LL() 6 → 7 → "superMan" → None

Inserting from the head

Head → Node1 → Node2 → Node3 → None

Node0 new_node.next = self.head

Head Node1 → Node2 → Node3 → None

Node0 self.head = new_node

self.head = Node1
self.head.next = Node2
self.head.next.next.next = Node3

Note: next represents the arrows/Pointers in the LL

Inserting from the tail

Head → Node1 → Node2 → Node3 → None

loops through the whole list

Head → Node1 → Node2 → Node3 → Node4 → None

```
self.head = Node1
self.head.next = Node2
self.head.next.next.next = Node3
```

Note: next represents the arrows/pointers in the LL
